

Parents/Guardians,

We are pleased to announce Idaho Falls School District 91 is launching STOPit!, a reporting system that will allow students, parents and patrons to anonymously report concerns about school safety.

STOPit! is an important addition to the district's safety systems. It provides an easy way for students, parents and patrons to anonymously report their concerns – anything from bullying to threats of violence – 24 hours a day, seven days a week, 365 days a year. **Concerns can be reported through STOPit in the D91App, through a link on school and district websites, a direct link on all student chromebooks devices or via a telephone hotline at (855) 999-0932.**

All reports will be reviewed by D91's administrators, its School Resource Officers and the STOPit's incident command center. As part of the review process, reports will be assessed and catalogued as:

- **“Concerning,”** which should receive a response within three working days,
- **“Non-Life Threatening,”** which should receive a response within 24 working hours,
- **“Life Threatening,”** which will get an immediate response from our team.

STOPit! makes it easy for administrators and SROs to reach out to those who submit concerns to request additional information through a two-way messaging feature. Those filing a report also can upload evidence like photos or videos.

Students will learn more about STOPit during special school assemblies and advisory period over the next week. More information is also available on the district website at www.ifschools.org. If you or your child have any concerns about school safety, we encourage you to use STOPit! so we can all work together to keep our schools safe.

Sincerely,
Katie Francis
D91's School Safety & SEL Coordinator
